### **Conflict Minerals Declaration**

Dear Customer:

In July 2010, the U.S. Government signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"). Section 1502 of the Dodd-Frank Act requires all US publicly traded companies to file disclosures and reports with the U.S. Securities and Exchange Commission (SEC) related to the use of "Conflict Minerals" in their products.

"Conflict Minerals" in this context refers to specific minerals originating from mines controlled by armed groups in the Democratic Republic of the Congo (DRC) or adjoining countries. The "Conflict Minerals" include Gold (Au), Tin (Sn), Tantalum (Ta), and Tungsten (W). These are also sometimes referred to as "3TG".

ITT Corporation is committed to complying with this legislation and plans to comply with forthcoming regulations.

We hold ourselves to the highest ethical standards. We expect the same of every member of our supply chain as reflected in ITT's Supplier Expectations Document, and Human Rights Policy which are available on our website <http://itt.com/citizenship/>.

ITT Aerospace Controls LLC is in the process of contacting its suppliers to determine what information is currently available with regard to the presence of 3TG in the our product lines. Due to the complexity of the routes by which metals, and in particular precious metals, are smelted, recycled, sold, including the common practice of commingling ores and scrap from many different sources, it is often impossible for any company to obtain full traceability to an exact origin of all of these materials.

Respectfully,

A handwritten signature in blue ink that reads "Lani Dimson".
